

SUPPLIERS OF THE WORLD'S LEADING BATTERIES & LUBRICANTS

R & J Batteries Pty Ltd supply some of the world's leading brands. We have a comprehensive range of batteries in stock to suit most automotive, commercial, industrial, motorcycle, marine, deep cycle, solar and UPS applications.

Our range of FUCH's lubricants includes petrol and diesel engine oil, transmission and gear oil, hydraulic oil, coolant, brake fluid, cleaners/degreaser as well as an extensive range of specialty industrial oil and lubricants.

BATTERY RECYCLING POLICY

R & J BATTERIES PTY LTD SUPPORTS AND ADVOCATES THE SAFE, SUSTAINABLE, LEGAL COLLECTION AND RECYCLING OF USED LEAD ACID BATTERIES (ULAB).

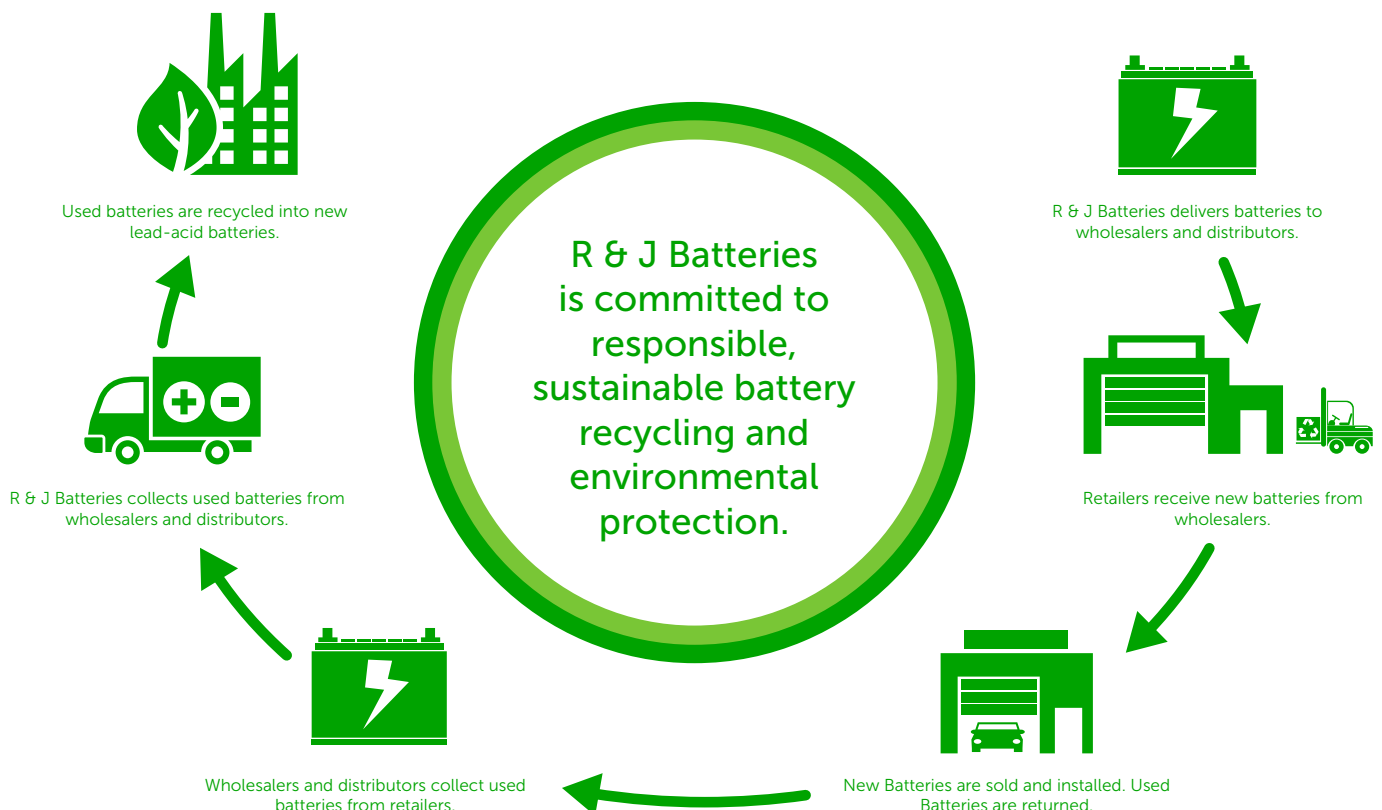

We support the principal of product stewardship: that the responsibility for environmental management of ULAB products including their recovery at end of life, is shared by organisations at every stage of the ULAB product life cycle.

All R & J Batteries Pty Ltd stores and warehouses are equipped and able to collect, store and arrange transportation of ULAB irrespective of the size or quantities.

Those R & J Batteries Pty Ltd stores that are affiliated with our sister company, Vic Scrap Batteries Pty Ltd may also be able to pay for ULAB collections subject to current prices, location and quantities. Please check with your local store for more details.

Where possible, R & J Batteries Pty Ltd endeavours to build in ULAB recycling options into all our major supply contracts and agreements.

We support only those recycling organisations that have the capability to recycle in a sustainable and environmentally sensitive manner. We DO NOT advocate or support black market collection and illegal off shore exporting operations.

ABOUT ABRI

We are a new industry based organisation that wants to make a positive difference to what happens to end of life batteries of any form sold into the Australian market, by being pro-active, professional and above all responsible in our approach and action.

ABRI's vision is effective stewardship of all end-of-life batteries. Its mission is to ensure recovery mechanisms are capable of maximising the value from re-use of finite resources and no batteries to landfill. ABRI's measure of success will be the increase in recycle rates when viewed against benchmarks established from fact driven baseline data.

ABOUT R & J Batteries

100% AUSTRALIAN OWNED & PROUDLY INDEPENDENT

Established in 1996, the philosophy of always delivering outstanding customer service combined with superior product range and quality has seen R&J Batteries continue to grow and develop into Australia's fastest growing battery company. We have now become a true force throughout Australia in the supply of batteries for all applications including automotive, commercial, motorcycle, marine, deep cycle, solar and industrial batteries.

With representation in every state and territory, our company-owned stores are all staffed by extremely dedicated and knowledgeable personnel who are committed to providing you with the very best in service and expert advice. To further enhance our national footprint we have developed an extensive network of specialist battery-industry distributors around Australia who will ensure that you receive the very best in terms of product and service no matter where you are.

Our experienced research and development team remain committed to seeking out the very latest in battery technology worldwide to ensure we offer you the best value possible. We continually work with our global supply partners to improve and refine the products we offer. All of this is aimed at providing our customers with a complete range of products and services which exceed all expectations.

Our intrinsic belief in building strong business relationships, based on mutual growth and by providing cost-effective solutions, coupled with the best service has always been our mission. This will never change.
