

## 23<sup>rd</sup> International Congress for Battery Recycling ICBR 2018

September 26 – 28, 2018, Berlin, Germany

ICBR is the international platform for presenting the latest developments and discussing the challenges faced by the battery recycling industry. The 23<sup>rd</sup> edition of ICBR will bring together many experts and decision makers of the battery recycling value chain such as battery manufacturers, battery recyclers, OEMs from the electronic and e-mobility industry, collection schemes operators, service and transport companies, policy makers and many more. Topics will be:

### Recycling

- How to recycle batteries from e-cars, e-bikes and other e-vehicles
- Recycling of batteries from energy storage systems of power plants
- Collection and recycling of cordless tools and electronic devices batteries
- Best available recycling technologies for batteries

### Materials Supply in a Circular Economy

- Battery materials supply and demand or “when the recyclers meet the raw materials suppliers”
- The role of batteries recycling in a circular economy
- Eco-design: A critical approach for batteries removability?
- The e-mobility and energy storage markets: An opportunity for new battery technologies?

### Transport and Safety

- Update of the transport regulation on batteries
- Safety of lithium batteries: Threats and opportunities
- Evolution of packaging requirements for lithium batteries

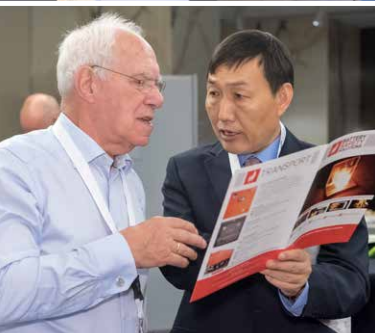

### The Batteries Directive Revision

- Update on the review process of the Batteries Directive 2006/66/EC
- The recycling efficiency of batteries: The need for a new “optimum” approach
- The collection efficiency of batteries: Considering urban mining and waste generation
- Challenges faced by the second life of lithium batteries: Performances, transport & safety and producer responsibility
- Impact of changes in hazardous waste regulations

### Worldwide Activity Review

- Worldwide updates about batteries take-back, collection schemes and recycling

## Exhibition

The exhibition area offers delegates the chance to network and forge great relationships. Promote your products to all congress attendees and book your booth today!

## Program

### Wednesday, September 26, 2018

- Opening and keynote speakers
- Presentations
- Cocktail reception in the exhibition hall
- Networking dinner

### Thursday, September 27, 2018

- Presentations
- Panel discussion
- Farewell cocktail in the exhibition hall

### Friday, September 28, 2018

- Plant tour to Nickelhütte Aue GmbH
- Workshop Lithium Batteries: Hazards and Safety in Storage and Transport

## Media Releases about ICBR 2017

### Steady growth for lithium-ion, but lead-acid market 'is not dead'

Source: Recycling International, December 2017 by Kirstin Linnenkoper

### Positive economic signals for battery recycling

Source: RECYCLING magazine International Edition, Winter/2017 by Michael Brunn

### First announcement:

- Yes, I am interested in attending the congress. Please send me further information.
- Yes, I am interested in having an exhibition booth. Please contact me.
- Yes, I am interested in sponsoring the event. Please contact me.
