

**President**  
**Ben Pritchard Ramcar**

- I seek to continue the initiatives identified in 2019.
- Having served a partial term as President I feel I have more to offer the association.
- I'm particularly passionate about the environment and delivering value of membership to the membership base.
- I feel this is best served at this time in harmonization of regulation and initiatives promoting good relationships between all stakeholders in end of life management of all batteries.

**Treasurer**  
**Daryl Moyle EcoCycle**

- Existing role as Treasurer.
- Strong desire to participate and contribute to the growth of ABRI.
- Financial and environmental skills provide abri with a capable, committed and focused individual.

**Executive Member**  
**Andy Jackson Lex Enviro Services**

- To assist in programs designed to make our industry a lot easier to navigate, get Government to appreciate the commercial aspect of their legislation and ensure that ABRI remains impartial and not driven by particular agenda's (which it has in the past, not now).
- I get a good network and up to date info from the group as a whole and there's always something to learn from being part of a committee.
- Hopefully what I bring is a level head as much as anything else, although that's open to question!

**Executive Member**  
**Janet Leslie Canon**

- Having had such a long association with ABRI I am keen to see it succeed in its objectives.
- Strong product stewardship program for batteries in Australia compatible with other programs, with high level of public awareness around the need for and mechanics of battery stewardship and recognition for ABRI as multi stakeholder thought leader in the field.
- I have history of the organisation and practical experience in the operation of product stewardship schemes.
- I bring the OEM view, as well as significant product stewardship, management systems and governance skills and experience.

**Executive Member**  
**Andrew McKenzie EnviroStream**

- To help support and influence policies, habits and market awareness of battery recycling.
- As founder of EnviroStream I bring a vast knowledge in processing, handling and issues that are in and arising from lithium ion batteries.
- I would like to see a growth in battery volume collected and recycled within Australia.
- I would like to be able to aid in the harmonisation of Australia's handling of waste batteries.

**Executive Member**  
**Will LeMessurier MRI**

- I have been active member of the executive for number of years and believe my experience and knowledge bring considerable benefits to ABRI and the industry at large.
- ABRI needs to project itself as the peak industry body for battery recycling in terms of policy and implementation of recycling schemes.
- It is a key period as these policies develop and are implemented.

**Executive Member**  
**Troy Rowe Resource**

- As a passionate member actively working on industry solutions, I am keen to stay in touch with others in the industry and engage in an active role within the industry.
- I am eager to support the committee in providing insight from a sector of the battery recycling industry whilst also working towards assisting the industry as a whole to grow through ABRI.
- As the only single use battery recycler in the country, I bring a particular knowledge base to the committee that perhaps does not exist today.

**Independent Observer**  
**Kylie Hughes QLD Dept of Env. & Science**

- Demonstrated commitment by Queensland Government to battery recycling/stewardship.
- Provides ability to help understand the needs of key stakeholders from recyclers to brand owners and regulators.
- Provides engagement and communication opportunities.
