

## Electrolyte management – a key environmental benefit when recycling lithium-ion batteries

Lithium Australia subsidiary [Envirostream Australia](#) Pty Ltd has been awarded an E-Waste Infrastructure Grant by Sustainability Victoria ([ASX announcement](#)). The grant will be used to install processing circuits at Envirostream's Melbourne facility, enabling efficient recovery of electrolytes from spent lithium-ion batteries.

In the [video](#) below, Lithium Australia managing director Adrian Griffin explains how this will benefit the environment, as well as how the recycling of chemicals within those spent batteries can improve the sustainability of the battery industry.
